## Assessment Rubrics(Source: CBSE CCE Manual)

#### **REPORTING STUDENTS' ACHIEVEMENT**

While reporting students' achievement in different areas, indirect grading in absolute scale having five points may be used. The grades will stand for the following distribution of marks:

- A+ Outstanding 90% 100%
- A Excellent 75% 89%
- B Very Good 56% 74%
- C Good 35% 55%
- D Scope for improvement Below 35%

The grade of the child can be computed in the achievement card based on the percentage of presence of behaviour indicator in the above category of percentiles. Besides certain remarks can be made in scholastic and co-scholastic areas as well as the achievement level of the child. These remarks will help the parents and the child to provide the learning skills in that area by devoting more learning efforts. Thus, continuous and comprehensive evaluation is a useful proposition for improvement of students' achievement through continuous diagnosis, remediation, encouragement and appreciation. It requires coordinated and concerted efforts on the part of Principals, teachers and parents for the multifaceted personality development of the child. The enclosed rating scales are expected to help the teachers in proper placement of students in terms of the different grades.

Divides a given number by another given number	through patterns and skip counting. Do not force children to rote memorize/cram multiplication tables. Encourage child to develop her algorithms for multiplication of numbers and facilitate to decide her best algorithm Providing opportunities to children to try out different ways of multiplication, for example to multiply 257 by 34 some child may develop a strategy to first multiply hundreds by 34 and then tens and ones. Some other child may decide to first multiply ones 34 times and then tens and hundreds Extending the idea of division of numbers in variety of ways like using equal distribution, as inverse process of multiplication. Facilitating children to develop their own algorithms for dividing numbers and then to decide the best one. Activities for equal distribution of some amount of money formed by notes of Rs. 1000, 100, 10 and 1to some number of persons will help in development of algorithms for division of numbers. Creating and exploring situations from child's daily life to apply number operations in solving	<ul> <li>numbers by using the expanded form of the number.</li> <li>Explores different ways of multiplying two or three digit numbers (eg. using individual digits, place value concept for multiplier etc.)</li> <li>Demonstrates understanding of division by dividing a given number by another number in a variety of ways, such as by grouping, repeat subtraction, using multiplication facts etc.</li> <li>Attempts to develop a word problem using he own experiences.</li> <li>And solving it by using various operations Freely uses four fundamental operations (addition, subtraction, multiplication and division) in day to day activities.</li> </ul>
Money Converts rupees to paisa and vice versa. Adds and subtracts using column addition and subtraction Uses four fundamental operations in day to day transactions	Providing opportunity to children to plan a shopping and to make estimates of money required in different denominations and the balance she will get. The children playing shopkeepers have to get exact amount by using different operations and also will try out their own ways to provide a record of the shopping in the form of a bill. Let children have discussion with the shopkeepers/hawkers etc. to know how do they make quick calculations for transaction	<ul> <li>Find rupees for given number of paisa and paise for given number of rupees.</li> <li>Shows understanding of finding total amount required or balance given in a transaction</li> <li>Uses addition and subtraction mentally for making calculations of small day to day dealings like small purchase (vegetables, milk, etc.) from market.</li> <li>Attempts multiplication and division to find out total cost on the basis of unit cost and vice versa.</li> </ul>

Using child's exposure of listening to standard unit of weight like kilogram and gram to relate them. Conduct activities related to observing empty pouches/boxes where weights in grams and kilograms are marked Involving children in estimating weights of different objects and to reach to the conclusion that bigger objects are to measured in kilograms and smaller in grams. Conducting activities to obtain weight of two or more objects by adding the number of kilograms/grams in the objects Relating the understanding of weights with money and activities of selling and buying situations.	<ul> <li>weight of an object and then verifies it with balance and standard units of weight (grams, kilograms etc).</li> <li>Tries to differentiate between the heavy and light weight objects and calculates the total weight of two different objects (addition) and difference in their weights (subtraction) where out of some given amount some amount is consumed, what left?</li> </ul>

4.4 Measurement: Time Computes number of weeks and days in a year, and correlates number of days in a year with number of days in each month. Reads clock time in hours and minutes and expresses time in am and pm. Finds the time intervals in simple cases by using forward counting and using addition and subtraction	Putting children in situation where they have to read a calendar to find different days corresponding to dates. Let children explore their own ways of finding number of days between two dates and to decide the methods of finding numbers of days in a month of a year. Utilizing child's experiences gained outside class and with in class having exposure to read clock in hours and minutes. Let the child learn the ways of reading different types of clocks with the help of other children. Providing exposure to find the time lapsed in two events by forward counting and by addition and subtraction. Let the child realize that operations on time are different than the operations on numbers being done by using place value system.	<ul> <li>Attempts to showcase the concept of week, month and year on the basis of number of days and uses this understanding to compute number of weeks in a year.</li> <li>Shows interest in reading the clock time nearest to hours and minutes and expresses the time using the terms 'a.m.' and 'p.m.'</li> <li>Explores ways (mental addition and subtraction) of finding time intervals between different familiar events and computes number of days between two dates.</li> </ul>
<ul> <li>Data Handling</li> <li>Collects quantitative data on two variables and represents it through table and bar graph</li> <li>Draws inferences with the help of teacher.</li> </ul>	The collection of information and making out meaningful inferences, out of it, is a routine activity being done by every child in daily life. Utilising this experience, involve children in devising ways of presenting data in different pictorial forms. Involve children in reading data given in various pictures/diagrams from newspapers and magazines. Help them draw out meaningful inferences out of the data given.	<ul> <li>Engages herself in organizing the two dimensional data in the form of tables, pictographs and/or bar graphs.</li> <li>Attempts to understand the key points emerging from the represented data.</li> </ul>

Asking children to explore patterns in numbers and multiplication facts like in multiples of 9 the sum of digits is also multiple of nine, table is formed by writing 9, 8, 7, 60 in ones place and 0, 1, 2,9 in tens place respectively. Ask children to explore similar patterns in multiplication facts of other numbers. There are many such patterns in the mathematics which child has learnt up till now. Let children explore, extend and generalize these patterns	<ul> <li>Identifies patterns in multiples of 9 and extends them to find more facts.</li> <li>Engages herself in understanding specific pattern of numbers in a series and extends it.</li> <li>Evolves patterns on sarees, clothes and tiles and extends them.</li> </ul>

#### What are the learning indicators of EVS Learning?

Broadly, the EVS learning is around ten processes as mentioned below. Thus the nature of learning indicators in EVS is process based. For classes III- V these learning indicators are same, however, the progression of learning from classes III- V can be seen through the complexity in the indicator. In order to understand the nature of complexity class III to IV, IV to V, suggestive examples have been given along with each indicator.

- 1. *Observation and Reporting* Explores shares, narrates and draws, picture-reading, makes pictures, collects and records information, tables and maps.
- 2. *Discussion* Listens, talks, expresses opinions, finds out.
- 3. *Expression* Expresses through gestures/ body movements, expresses verbally, expresses through drawing/writing/sculpting, expresses through creative writing.
- 4. *Explanation* Reasoning, makes logical connections, describes events/situation, formulates one's own reasoning's, make simple gestures, thinks critically, and makes logical connections
- 5. *Classification* Identifies objects based on observable features, identifies similarities and differences in objects, sorts/groups objects based on observable features. Compares objects and classifies them based on physical features.
- 6. *Questioning* Expresses curiosity, asks questions, raises critical questions, frame questions.
- 7. *Analysis* defines situation/ event, identifies/predicts possible causes of any event/situation, making hypotheses and inferences.
- 8. *Experimentation* Improvises makes simple things and perform simple experiments.
- 9. *Concern for Justice and Equality* Sensitivity towards the disadvantaged or differently abled, shows concern for environment.
- 10. *Cooperation* Takes responsibilities and takes initiatives, shares and works together with empathy.

#### • Observation and reporting:

Observes and explores environmental objects, plants, animals, shelters **simple phenomenon in the surroundings**. For e.g., "identifies variations in plants (leaves, flowers), animals (bird's beak, claws, feather, and nests) mode of transports, and variation in seasons, give examples of each".
